

NJ LACAMBRA

Jacksonville, FL | n.lacambra@ufl.edu | 904.930.6706 | njneered.github.io

EDUCATION

University of Florida

Dec 2026

Bachelor of Science in Computer Science

Relevant Coursework: Machine Learning, Human-Computer Interaction, Operating Systems, Computer Networks, Data Structures & Algorithms, Software Engineering, Database, Computer Organization, UX Design, Linear Algebra with MATLAB

SKILLS

Technical Languages: JavaScript, TypeScript, Python, C++, Java, SQL, HTML, CSS, MATLAB

Tools: Jupyter Notebook, Figma, React/React Native, Expo, Flask, Supabase, SFML, Postman, Git

Design: UI/UX Design, Wireframing, Prototyping, Storyboarding, User Research

EXPERIENCE

Research Assistant | CSEveryone Center, University of Florida

Jan 2026 - Present

- Research and evaluate PLTs (Scratch, EarSketch, VEX, Sphero) for K–12 CS use
- Build a research database documenting tool capabilities and factors influencing teacher adoption
- Collaborate with a postdoctoral associate to develop CODET, a scalable CS education platform

Operations Associate | University of Florida Recreational Sports

Aug 2024 - Jan 2026

- Supported daily facility operations at Southwest Rec and Student Rec Center
- Enforced safety protocols while assisting members and resolving issues on-site
- Provided front desk service and maintained a welcoming, organized environment

Robotics Teaching Assistant | UFTeach, Loften High School

Jan 2025 - Apr 2025

- Mentored students in debugging VEX robots for competition readiness
- Supported troubleshooting in Python and C++ code, and physics concepts
- Assisted in classroom interaction and promoted collaborative problem-solving

PROJECTS

CODET | Programmable Learning Technology Library

Jan 2026 - Present

- Led UI/UX design, creating prototypes and improving database usability for K–12 educators
- Conducted user research and usability testing, analyzing feedback to refine design and usability
- Contributed to website and database development, including tool selection and system design

Hangout. | Social Coordination Platform

Apr 2026

- Lead product direction and coordinate development, overseeing user research and user testing
- Developed iOS frontend with Swift, with reactive state management and real-time data updates
- Built interactive calendar and event UIs with real-time data binding and dynamic updates

Yeet or Eat | Food Review Web Application

Aug 2025

- Led as Product Manager and Frontend, defining feature scope, user flows, and sprint priorities
- Built a meme-style food review app with tags and journal-style posts (React.js, Flask, Supabase)
- Designed responsive UI, owned wireframing, storyboarding, and sprints with UX-focus

The Floor is Lava! | Isometric Route Planning Simulation

Apr 2025

- Built a grid-based game with optimal route calculation using Dijkstra's, A* (C++, SFML)
- Designed custom pixel-art tiles and gator sprite for visual clarity using SFML
- Managed game state, tile logic, and route animations with object-oriented programming
