

NJ LACAMBRA

Jacksonville, FL | n.lacambra@ufl.edu | njneered.github.io

EDUCATION

University of Florida

Dec 2026

Bachelor of Science in Computer Science

Relevant Coursework: UX Design, Human-Computer Interaction, Machine Learning, Operating Systems, Computer Networks, Data Structures & Algorithms, Software Engineering, Database, Computer Organization, Linear Algebra with MATLAB

SKILLS

Technical Languages: JavaScript, TypeScript, Python, C++, Java, SQL, HTML, CSS, MATLAB

Tools: Figma, Jupyter Notebook, React/React Native, Expo, Flask, Supabase, SFML, Postman, Git

Design: UI/UX Design, Wireframing, Prototyping, Storyboarding, User Research

EXPERIENCE

UX Design Research Assistant | *UF CS Everyone Center*

Jan 2026 - Present

- Research and evaluate Programmable Learning Technologies for K-12 CS educational use
- Apply information architecture and UX principles to design CODET's UI, a K-12 CS ed repository
- Prototype in low- and high-fidelity (wireframes, Figma), and plan usability testing (SUS, SEQ)

Operations Associate | *University of Florida Recreational Sports*

Aug 2024 - Jan 2026

- Supported daily facility operations at Southwest Rec and Student Rec Center
- Enforced safety protocols while assisting members and resolving issues on-site
- Provided front desk service and maintained a welcoming, organized environment

Robotics & Coding Mentor | *UF Teach at Loften High School*

Jan 2025 - Apr 2025

- Mentored students in debugging VEX robots for competition readiness
- Supported troubleshooting in Python and C++ code, and physics concepts
- Assisted in classroom interaction and promoted collaborative problem-solving

PROJECTS

CODET | *Programmable Learning Technology Library*

Jan 2026 - Present

- Led UI/UX design, creating prototypes and improving database usability for K-12 educators
- Conducted user research and usability testing, analyzing feedback to refine design and usability
- Contributed to website and database development, including tool selection and system design

Second Opinion | *Health Misinformation Checker*

Aug 2026 - Present

- Led UI/UX design for a tool that grades health claims and returns science-backed verdicts
- Conducted user testing using SEQ, SUS, and NASA-TLX to evaluate usability and cognitive load
- Led stakeholder presentations and design slide decks to communicate UX and research findings

Am I Cooked? | *Job Placement Predictor*

Aug 2026

- Developed an interactive ML-powered job placement prediction tool using Python & ipywidgets
- Compared Logistic Regression, Random Forest, & XGBoost via cross-validation and tuning
- Served as Project Manager overseeing project coordination, presentation design, and final demo

Hangout. | *Social Coordination Platform*

Apr 2026

- Lead product direction and coordinate development, overseeing user research and user testing
- Developed iOS frontend with Swift, with reactive state management and real-time data updates
- Built interactive calendar and event UIs with real-time data binding and dynamic updates
